Summary

Highly skilled frontend developer with expertise in HTML, CSS, SASS, JavaScript, React, Redux, and Bootstrap. Experienced in building responsive and visually appealing web applications with a focus on user-centric design. Proficient in modern frontend frameworks and libraries, with a strong understanding of best coding practices and web standards. Demonstrated ability to collaborate effectively with cross-functional teams to deliver high-quality projects within tight deadlines. Proven track record of translating design mockups into pixel-perfect, interactive user interfaces. A proactive learner who stays updated with the latest frontend technologies and strives for continuous improvement. Committed to delivering exceptional user experiences through clean, maintainable code and intuitive UI designs.

Experience

- Making a website for a wine company (2022) (React, Redux)
